

The Problem

Normal clothes hangers are part of everyday life, but are not particularly easy to use. Especially for people with disabilities or impairments.

The Solution

With just three steps the Flexible Flat-Pack Clothes Hanger is easily inserted into the garment.

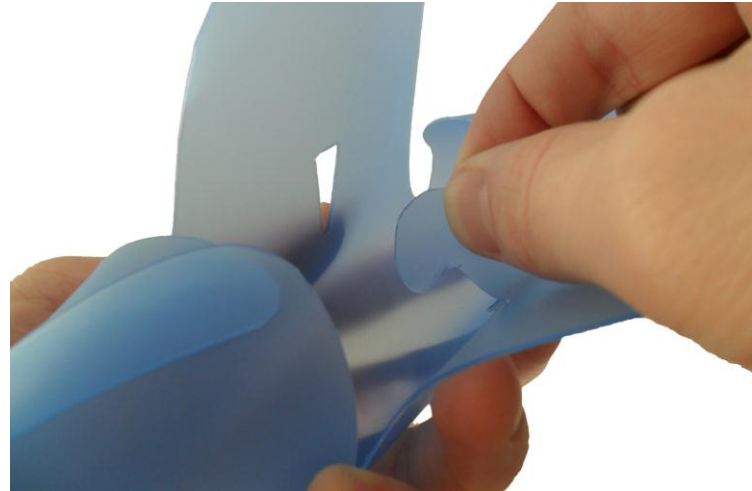

Key Features

Consists of just one piece

Constructed using tabs

Flexing arms

Locking hook

Materials and Manufacture

- Consists of one piece of 800 micron polypropylene sheet
- Can be Laser-cut or Die-cut
- Manufacture is very quick, cheap and easy.

Sustainability

- 100% recyclable
- No disassembly required
- Easy to machine so less energy is needed for production
- Flat-pack maximises the use of storage space
- Lightweight so less fuel is used in transportation
